BMO, 100 King Street West, Toronto, ON M5X1A3

Re: Software Developer, Fall 2021 (Co-op/Internship)

Dear Hiring Manager:

Being immersed in the software development industry for more than ten years, with substantial interest in software design and programming, I was inspired to pursue graduate level Computing Science study, I hope to apply my experience and skills as a software developer to support BMO's needs as I value your respective and innovative culture, admire your distinguished reputation and relate to your vision of Grow the good in Business and life.

Working as a Software Developer and later as a SaaS System Engineer in Micro Focus, I developed and advanced skills in Python, C++/C#, and consolidated knowledge on software Object Oriented Design. During the period, I worked on a world-class Functional Testing tool primarily written in C++, and then moved to our SaaS Delivery Team to work as a SaaS System Engineer where I designed and implemented automations with Python, NumPy, Pandas, Jenkins, Terraform, Oracle/PostgreSQL to simplify and standardize operational process in the SaaS Delivery organization.

Apart from work experience, I have successfully completed several academic projects during my Master of Applied Computing program, where I not only applied my capability formed from employment experience, but also employed the knowledge and skills obtained during the graduate education including TensorFlow, Keras, Neural Network, MongoDB, ex cetera.

I will be arriving in Canada in July 2021 for the my internship term.

I sincerely appreciate the opportunity sharing more about my design, programming, and data analysis skills during an interview for the software developer position. Thank you for your time reviewing my application.

Best regards,

Wen Dong
