Re: Data Scientist Co-op

Dear Recruiter at CIBC:

Being immersed in the software development industry for more than ten years, with substantial interest in software design and data analysis, I was inspired to pursue graduate level Computing Science study, I hope to apply my experience and skills as a Data Scientist Co-op to support CIBC's needs as I value your innovation-focused and diverse culture, admire your distinguished reputation and relate to your vision to enhance client experience and change the way that people bank.

Working as a Software Developer and later as a SaaS System Engineer in Micro Focus, I developed and advanced skills in Python/C++, and Cloud Computing, and consolidated skills on software design and programming.

Apart from employment experience, during my Master of Applied Computing program in University of Windsor, I learned hard on data analysis – Deep learning and Machine learning in the hope of shifting to this amazing and interesting arena, and successfully completed two relevant academic projects with TensorFlow, Keras, Neural Network, MongoDB, ex cetera.

I sincerely appreciate the opportunity sharing more about my design, programming, and data analysis skills during an interview with you. Thank you for your time reviewing my application.

Best regards,

Wen Dong
