

1- What is NetLogo? (200 words max)

NetLogo is a multi-agent programmable modelling platform, where you can trial a variety of sample models.

2- What is your favourite model (run it and explain what is interesting about it)? (200 words max)

Bug Hunt Coevolution is my favourite model, I played it multiple times with different setups, the impressive parameter is initial-bug-vision, when it was set to a enough big value like 3.5, most of the bugs were not eaten by the hunters, it displayed a certain degree of artificial intelligence on the bugs.

3- What are the top three Free ABM tools today? Provide web links.

Xtensio - <https://xtensio.com/user-persona/>

LinkedIn Sales Navigator - <https://business.linkedin.com/sales-solutions/sales-navigator>

Clearbit - <https://connect.clearbit.com/>

4- What are the top three Commercial ABM tools today? Provide web links.

Terminus - <https://terminus.com/>

Demandbase - <https://www.demandbase.com/>

Triblio - <https://triblio.com/>

5- Which tool do you think you will use for your Project?

I will use a conjunction of LinkedIn Sales Navigator and Clearbit, for former to build and maintain my networks, while using the latter for identifying prospects and grow my networks.
