

Dear recruiter at Canopy Growth,

Hope you are safe and well!

I learned the Cloud Engineer role from LinkedIn, the tech stack looks exciting to me, and I am very interested in this role.

I am a Master of Applied Computing student in University of Windsor, open to fulltime job - from Sep 2021, with 4-month Co-op followed by at least 3-year PGWP.

Meanwhile, I am a Christian and vegetarian & meditator, mentally and physically healthy, energetic, and quick learner.

Good at Python (3+ years), AWS (2 years & certified), C/C++ (10 years).

Thank you for reviewing my application.

Wen Dong

Best regards
