Name: __Wen Dong__ Student ID: _110057395_
Speaker Name:__ Dr. Ziad Kobti_ Speaker Title: __Professor of UWindsor___
Title of Talk: _path for success as an IT practitioner_ Date of Talk:_18th June_

Summary:

Keeping up Learning is crucial for the success in the career of IT practitioner, especially in such a drastically evolving technology world, new programming languages, software design methodologies, algorithms and even ground-breaking area are emerging every year.

What to learn?

Mastering the knowledge of general design concept and philosophy in technical arena is paramount, for example, object-oriented design and analysis, class inheritance, multi-threading, design patterns, as they are the shared knowledge base between any advanced programming language, providing us the ability to wrap up any concrete programming language or algorithms quickly. Technology is changing fast, while the keystone behind the change is constant.
