CALGARY /ALTAML APPLIED AI LAB

Re: DATA SCIENCE / INTERN

Dear AltaML Recruiters,

Being immersed in software development for more than ten years, with tremendous interest in data science, I was motivated to pursue graduate level study in advanced computing focusing in AI area, I hope to apply my knowledge and skills to work for AltaML as a data science intern, as I value your core values – Humble, Happy and Agile, admire the opportunity and the friendly environment for new practitioner.

Working as a Software Developer and later as a SaaS System Expert, I developed and advanced skills in Python/Pandas/Numpy, C++/C#, AWS, and consolidated knowledge on software design.

Apart from work experience, I have completed several Machine Learning academic projects during my Master of Applied Computing program, where I not only applied programming and design capability formed from employment experience, but also employed the knowledge and skills obtained during the graduate education, including TensorFlow/Keras, Neural Network, Machine Learning, MongoDB, ex cetera.

I sincerely appreciate the opportunity sharing more about my software programming and design, and data analysis skills during an interview. Thank you for your time reviewing my application.

Best regards,

Wen Dong
